

**MOTUL PRESENTS TO ALL
A FREE SERVICE**

MOTUL
Racing Lab

MOTUL IS BRINGING A LUBRICANT ANALYSIS MACHINE TO HELP COMPETITORS CROSS THE FINISH LINE

Motul Racing Lab is a state-of-the-art mobile laboratory capable of analysing the lubricants running in your engine. This free service is offered to The Classic competitor during the weekend event.

What will these analyses bring to you?

This predictive tool will allow you and your team to organise your maintenance schedule (parts replacement, oil change etc...).

The Motul Racing Lab can:

Search for metal elements present in the lubricant to detect premature or accelerated engine wear and thus know if it is necessary to carry out replacement of a part(s).

Analyse the composition of the lubricant in use to highlight any coolant leaks or fuel dilution that may damage the engine and limit its performance.

Follow the evolution of these factors daily and recognise the development of lubricant ageing and degradation due to the extreme conditions of use.

HOW TO BENEFIT FROM MOTUL RACING LAB SERVICE

A SERVICE FOR EVERYONE

1

To benefit from this service, you just have to go to the Motul truck, positioned in the **Paddocks National each morning & International each afternoon**, in order to request an analysis kit.

2

Once you have the analysis kit, you can complete the registration form with all information needed by **Motul experts** to do the analysis and the follow up.

3

Fill the sample containers with the lubricant you want to analyse. If your lubricant has been in use for a number of hours, bring a fresh lubricant sample to monitor the evolution.

4

Put the sticker with the information needed on the sample and bring it to the **Motul Racing Lab** at the **Motul Truck** in the **Paddock area**.

5

Motul experts will run the analysis and will then make you a debrief. Once it is done you get a new sample container for your next analysis.

MOTUL

Unanimously recognized for more than 160 years for the quality of its products, its capacity for innovation and involvement in the field of competition, Motul is also acknowledged as the specialist in synthetic lubricants.

Passion is what unites lovers of engineering with their machinery, the same passion that Motul puts into innovation.

Constantly exercising its right to invent, Motul displays a dedication to the best. From Pennsylvania's first oil rig to the brand's latest laboratory, the unfolding quest for improvement fuels the company, day-to-day and innovation-to-innovation.

The ingenuity connection established between Motul and its community is the main key to achieving the unachievable, to push beyond common criteria and to fundamentally building long-lasting efficiency

Supporting its customers' projects and fighting alongside them for cost-efficiency is the way that Motul makes its commitment to them, and in a way that no-one else would.

Thanks to this commitment, Motul is now chosen by some of the most renowned workshops and motorsport teams worldwide.

FOR OIL

MOTUL

Competitor number / Name

Category

Manufacturer

Type of Model / Engine

Model Year

Total Hours / Kms of the vehicle

Oil taken from (Engine, Gearbox,....)

Oil Brand

Full brand name of the oil (ex : Motul 300V Off Road)

Viscosity grade (ex: 5W40)

Running hours / kms of the oil

Fresh oil sample provided*:

Yes No

* If your lubricant has been running for a few hours, bring some fresh oil to monitor the evolution.
